

Regulatory Compliance Training Courses
2012 Schedule

Location: ED&D's Regulatory Compliance Training Center/Lab
Research Triangle Park, NC, USA

2012 Course Schedule:

Dates	Course
May 15 – 17, 2012	Laboratory, Measurement, & Control Equipment UL/CSA/EN/IEC61010-1 Including an overview of EN61326-1: EMC Requirements 3 day course <i>Understanding the requirements,</i> <i>Hands-on training in how to perform the tests,</i> <i>How to design for compliance</i> Cost: \$1,995.00
June 12 – 13, 2012	Ingress Protection EN/IEC60529 & UL/CSA/EN/IEC60950-22 2 day course <i>Understanding the requirements,</i> <i>Hands-on training in how to perform the tests,</i> <i>How to design for compliance</i> Cost: \$1,495.00
July 17 – 19, 2012	Information Technology Equipment UL/CSA/EN/IEC60950-1 3 day course <i>Understanding the requirements,</i> <i>Hands-on training in how to perform the tests,</i> <i>How to design for compliance</i> Cost: \$1,995.00
Aug. 21 – 24, 2012	Electrical Medical Equipment UL/CSA/EN/IEC60601-1 4 day course <i>Understanding the requirements,</i> <i>Hands-on training in how to perform the tests,</i> <i>How to design for compliance</i> <i>Combined 2nd and 3rd Edition based course</i> Cost: \$2,495.00

2012 Course Schedule: Continued

Dates	Course
Sept. 18 – 20, 2012	Hazardous Location Equipment UL/CSA/EN/IEC60079-0 + particulars, CE-ATEX, IECEX 3 day course <i>Understanding the standards & code requirements, UL/CSA standard transition to IEC harmonized, Methods to design for compliance including intrinsically safe, purged/pressurized, & explosion proof</i> Cost: \$2,295.00
Oct. 9 – 11, 2012	Laboratory, Measurement, & Control Equipment UL/CSA/EN/IEC61010-1 3 day course <i>Understanding the requirements, Hands-on training in how to perform the tests, & How to design for compliance</i> Cost: \$1,995.00
Oct. 24 – 25, 2012	Ingress Protection EN/IEC60529 & UL/CSA/EN/IEC60950-22 2 day course <i>Understanding the requirements, Hands-on training in how to perform the tests, & How to design for compliance</i> Cost: \$1,495.00

Key Features of ED&D Compliance Training Courses:

- Courses are taught by highly experienced Certification engineers – our engineers have worked at some of the top certification labs and they are extremely knowledgeable in worldwide compliance requirements = all training includes US/UL, CAN/CSA, EU/CE, and IEC/International standards.
- All courses integrate actual products examples – proven to help connect the requirements in the standard to actual product design. Attendees are also invited to bring their product to the seminar for correlation between the compliance requirements and how they apply to *your* product. There is no better way to learn than on your own product.
- We teach not only the requirements but also “how to design for compliance” – a critical element to your education that is missing from most other compliance seminars.
- Our facility was designed specifically for compliance training, including a full test lab in the training room for a true “hands-on” education in how to conduct the compliance tests.
- Private training for development teams and corporations is available at our facility or yours. We are experts at adapting our training to specifically meet your needs.
